

MATHEMATICS GRADE 4-6

SECTION 4 CHANGES

PRESENTATION OUTLINE

1. PURPOSE
2. FORMS OF ASSESSMENT TASKS
3. MINIMUM NUMBER OF FORMAL ASSEMENT TASKS TO BE ADMINISTERED
4. MINIMUM SUGGESTED MARKS PER ASSESSMENT TASK
5. ASSESSMENT GUIDELINES
6. WEIGHTING OF ASSESSMENT TASKS FOR REPORTING PURPOSES (PER TERM)
7. WEIGHTING OF ASSESSMENT TASKS FOR PROGRESSION AND PROMOTION PURPOSES
 - SBA
 - END OF THE YEAR EXAMINATION
8. CALCULATION OF FINAL MARK FOR THE LEARNER

PURPOSE

- To outline the changes in CAPS Section 4.
- To indicate the minimum number and type of formal assessment tasks to be administered per term.
- To determine the minimum suggested marks per task.
- To outline the assessment guidelines per Grade for Examinations (June and End of the Year) and the suggested marks per topic.
- To determine the weighting of assessment tasks for reporting purposes (per term).
- To indicate the weighting of tasks for progression and promotion purposes (SBA and End of the Year examination).
- To calculate the FINAL percentage mark for the learner.

FORMS OF ASSESSMENT TASKS

There are 5 forms of formal assessment tasks in Mathematics:

- Assignment
- Investigation
- Test
- Project
- Examination

CHANGES IN NUMBER OF FORMAL ASSEMENT TASKS PER TERM

TERM	CAPS (p. 294)		REVISED SECTION 4 (p. 3)	
	NUMBER	FORM	NUMBER	FORM
1	2	Test	2	Test
		Assignment		Assignment
2	2	Test	2	Investigation
		Examination		Examination
3	2	Test	2	Test
		Project		Project
4	3	Assignment	1	Examination
		Investigation		
		Examination		
Total	9		7	

MINIMUM SUGGESTED MARKS PER ASSESSMENT TASK

- The **minimum suggested** marks for tests, assignment, investigation and a project is 25 marks per task, **throughout the phase**.
- For examinations (June and End of the Year), two papers have been suggested per grade per examination.
- The following are the minimum suggested marks and Content Areas per paper per grade.

PAPER	CONTENT AREAS	GRADE 4	GRADE 5	GRADE 6	DURATION
1	Numbers, Operations and Relationships	25 marks	30 marks	40 marks	1 hour per paper
2	Patterns, Functions and Algebra, Space and Shape, Measurement and Data Handling	25 marks	30 marks	40 marks	

ASSESSMENT GUIDELINES

- Table 4.3.1 to 4.3.12 indicate the assessment guidelines for examinations (June and End of the Year) per grade (see pages 7 -12).
- Each topic is allocated minimum marks that can vary by ± 2 marks.
- Should the minimum suggested marks **be exceeded**, use the percentage mark to calculate the mark allocation per topic, i.e.

Mark allocation per topic = % mark per topic \times total mark for the paper

N.B. % mark per topic is always out of 100

WEIGHTING OF ASSESSMENT TASKS FOR REPORTING PURPOSES (PER TERM)

- The total weighting of assessment tasks per grade per term is 100 %.
- The weighting of each assessment task per grade is 50 %.
- To calculate the percentage mark for each task per term, divide the learner's mark by the total mark for the task and multiply by 50, i.e.

$$\% \text{ mark per task} = \frac{\text{learner mark}}{\text{total per task}} \times 50$$

OR

multiply the learner's %mark for the task by 50%, i.e.

$$\% \text{ mark per task} = \frac{\text{learner mark}}{\text{total per task}} \times 100 \times 50\%$$

- To calculate the overall % mark for the term, add the percentage marks for the two tasks per term.

WEIGHTING OF ASSESSMENT TASKS FOR PROGRESSION AND PROMOTION PURPOSES

SBA AND ITS WEIGHTING

- All tasks (Assignment, tests, investigation, June examination and Project) except the End of the Year Examination form School Based Assessment (SBA).
- The weighting for SBA for Grades 4-6 is **75%**.
- The table below indicates the weighting of each task for SBA.

Test	Assignment	Investigation	June examination	Project
11,25%	15%	11,25%	15%	11,25%

N.B. There **are 2 tests** and **each test** has a weighting of 11,25%.

SBA AND ITS WEIGHTING

- To calculate the percentage mark for each task for SBA, divide the learner's mark by the total mark for the task and multiply by the weighting of that task, i.e.

$$\% \text{ mark per task} = \frac{\text{learner mark}}{\text{total per task}} \times 100 \times \text{weighting of the task}$$

N.B. weighting is a percentage, thus always out of 100

- To calculate the total SBA mark for the learner add all the above % marks.

END OF THE YEAR EXAMINATION AND ITS WEIGHTING

- The % weighting for End of the Year exam for Grades 4-6 is **25%**
- To calculate the percentage mark for End of the Year Examination, divide the learner's mark by the total mark for the two papers and multiply by 25, i.e.

$$\% \text{ mark for End of the Year exam} = \frac{\text{learner mark}}{\text{total per task}} \times 25, \text{ or}$$

multiply the learner's %mark for the exam by 25%, i.e.

$$\% \text{ mark per task} = \frac{\text{learner mark}}{\text{total per task}} \times 100 \times 25\%$$

OVERALL MARKS FOR THE LEARNER

- To calculate the overall % mark for the learner, add the % for SBA and % for End of the Year Examination, i.e.

*Total % mark = % mark for SBA +
% mark for End of the Year Examination*
